About Acquired Brain Injury

The disability called Acquired Brain Injury - or "ABI" - refers to any damage to the brain that occurs after birth. That damage can be caused by an accident or trauma, by a stroke, or a brain infection, by alcohol or other drug abuse, by a lack of supply of oxygen or by diseases of the brain like Huntington's disease.

Brain Injury is common. Over 500,000 Australians have an Acquired Brain Injury. 3 out every 4 of them are aged less than 65. As many as 2 out of every 3 acquired their brain injury before they turned 25. 3 out of every 4 are men.

The leading cause of Acquired Brain Injury is what's called a stroke - where the supply of blood to a person's brain is stopped by a clot or bleeding. It often results in physical disability as well as changes in a person's thinking and emotions. In 2003, as many as 350,000 Australians reported having had a stroke at some time in their lives. Around 60,000 new strokes occur every year - a number that's growing as Australia's population ages. Strokes normally occur in older age people, but around 1 in every 5 strokes happens to a person aged less than 55.

The next largest category of Acquired Brain Injury is those caused by an accident or trauma - Traumatic Brain Injury, or "TBI". It is an injury the result of force applied to the head. Over 22,000 Australians went to hospital as a result of a Traumatic Brain Injury during 2004-2005. Most of those Traumatic Brain Injuries - over 2 in every 5 - were caused by a fall, nearly 1 in 3 due to a motor vehicle accident, 1 in 6 from an assault.

Because it is the brain that is injured, people can experience a range of disabilities that will affect them physically but also in the way they think, feel and behave.

Brain Injury Australia

Brain Injury Australia is the peak Acquired Brain Injury (ABI) advocacy organisation representing, through its State and Territory Member Organisations, the needs of people with an ABI, their families and carers. It works at a national level to ensure that all people living with Acquired Brain Injury have access to the supports and resources they need to optimise their social and economic participation in the community.

Brain Injury Australia advocates for Australian Government policies, programs and services that reflect the needs and priorities of people with an ABI, their families and carers. It provides input into policy, legislation and program development through active contact with Australian Government ministers, parliamentary representatives, Australian Government departments and agencies, and national disability organizations.

Formerly known as Head Injury Council of Australia, Brain Injury Australia was formed at the first national community-based conference on ABI in 1986.

Brain Injury Australia's Role

- Advocate for government program allocations and policies that reflect the needs and priorities of people with acquired brain injury and their families;
- Provide effective and timely input into policy, legislation and program development through active contact with Australian Government ministers, parliamentary representatives, Australian Government departments and agencies, and national disability organisations;
- Initiate and coordinate national projects;
- Increase national public awareness of acquired brain injury through the implementation of public information programs;
- Monitor Australian Government consumer consultation processes to ensure that these are of a quality that is meaningful and inclusive of people with acquired brain injury and their families; and
- Develop strategic alliances that support and enhance the achievement of its strategic objectives.

Brain Injury Australia's Operating Principles

- A professional and responsible approach in representing people living with an ABI;
- Decision-making processes which include consultation with people living with an ABI, their families and carers and its Member Organisations;
- A balanced recognition of the needs of all people with a disability and other disadvantaged groups;
- An effective, democratic and participative approach to governance; and
- Full financial and program accountability to membership and to funding agencies.

Brain Injury Australia's Structure

Brain Injury Australia's membership is made up of State and Territory-based brain injury associations which represent and provide support to people living with an ABI, their families and carers. Brain Injury Australia's office is located in Sydney and employs 1 full-time and 1 part-time staff member. The Executive is responsible to a Board of Management which meets bi-monthly and is composed of two delegates from each State Member Organisation. Brain Injury Australia operates under an agreed set of Rules of Association and is an incorporated association.

President's Report

Kerry Stafford

The 2008-2009 period has seen significant change for Brain Injury Australia. One major development was the move of the office from Melbourne to Sydney toward the end of last year. This relocation under the guidance of Nick Rushworth, our Executive Officer, was done very efficiently and caused little disruption to the valuable work that needed to continue as part of our strategic direction.

Unfortunately the relocation saw the farewell of staff members Paula Armstrong and Sally Goldner. I wish to thank them for their assistance in the roles that they held to keep us running smoothly whilst in Melbourne and during our transition to Sydney.

With our strategic direction set for the year:

- To drive changes to improve the lives of people with an acquired brain injury;
- To build strong relationships with our members and potential members and those they represent;
- To cultivate and nurture relationships with key allies; and
- To get the organization right.

The emphasis for the work activity focused on:

- The successful holding of our 2nd National Conference in September in partnership with ARBIAS with 350 people attending;
- Consulting with people with ABI, our State members and the ABI sector (we currently have about 1,000 email address distribution);
- Producing a policy paper on falls-related Traumatic Brain Injury;
- Producing a 30-minute ABI training program on DVD for Job Capacity Assessors, Centrelink and Employment Service Provider staff.
- Contributing to major submissions and raised issues on:
 - Future of Disability Employment Services
 - National Disability Strategy
 - Green Paper "Which Way Home? A new approach to Homelessness"
 - National Disability Agreement
 - National Mental Health and Disability Employment Strategy

- Department of Human Services review of Job Capacity Assessment.
- Working collaboratively with other National Disability Peak Organisations particularly through our membership with Australian Federation of Disability Organisations (AFDO)
- Holding regular meetings with Senior Government Managers at the National level to increase awareness and understanding of ABI.
- Presentations given at key forums.

None of this work would have been possible without the strong leadership, high energy and dedication of our Executive Officer, Nick Rushworth. He has worked tirelessly to assist the organization achieve our priorities and strategic goals under some very difficult circumstances. I wish to thank him for his contribution to making this year a success.

I would also like to thank Robert Curran, our Office Manager, who had to hit the ground running in the position of Office Manager in Sydney. He has proved an invaluable member of staff for improvements in operational functions of the Organisation.

I would like to thank the Board for their commitment, guidance, advice and efforts throughout year in the governance of the organisation.

With our Strategic Plan set to continue to guide us, our leadership under Nick in the year ahead promises to be a positive and exciting one.

Kerry Stafford
President

Executive Officer's Report

Nick Rushworth

I am sure that the year must have begun – as the last one would have ended – with work on Brain Injury Australia's 2nd National Conference, held in conjunction with the Alcohol and other drug Related Brain Injury Australian Services' (ARBIAS) 2nd International Conference on Alcohol and Other Drug Related Brain Impairment.

The conference was more of a critical, than financial, success. The reviews were good. The 350 attendees got value out of the sessions. Dr Tim Feeney, Project Director for New York State's Neurobehavioral Resource Project – a last minute replacement for a keynote speaker forced to drop out – was a particular hit.

Dr. Feeney stayed on in Australia to deliver day-long workshops in Hobart and Sydney co-hosted by Brain Injury Australia, the Brain Injury Association of Tasmania and the Brain Injury Association of New South Wales.

Bill Shorten, Parliamentary Secretary for Disabilities and Children's Services, opened the conference.

An art exhibition called "Headcase" – featuring works by and about people with an Acquired Brain Injury (ABI) – was

also well received, and resulted in a significant donation to Brain Injury Australia from sales. Even with that, and a significant amount of government and private sponsorship, the conference barely broke even.

There's little doubt that Brain Injury Australia's second National Conference was less well-conceived than its first. And while such events are always meant to be more than money makers, once you include staff work hours (which is why I started with "I am sure that this year must have begun...") they chew up an enormous amount of time and energy, perhaps always disproportionate to any potential return. And I'm not sure that the Board is convinced that they're "core business" for an organisation engaged in disability advocacy anyway.

Planning for a third conference has been postponed indefinitely in favour of seeking opportunities for workshops, for training featuring local and international expertise in – and consumer experience of – ABI.

Brain Injury Australia sought to capitalise on the national publicity given to three bashing deaths outside

Melbourne nightclubs in the first half of 2008 by focusing on assault-related Traumatic Brain Injury as the theme for Brain Injury Awareness Week. The theme was acknowledged by State and Territory ABI organisations and received wider coverage - in both print and broadcast media - than previous weeks.

The Board decided to relocate Brain Injury Australia's office from Melbourne to Sydney. Brain Injury Australia was able to secure premises, alongside nine other disability organisations, in the Social Enterprise Centre at Auburn in Sydney's Western Suburbs.

The Centre was devised to be a disability "hub" modelled on a United Kingdom experiment called "Mezzanine 2" - where a variety of not-for-profit organisations are collocated with consultants in order to both enhance their management and encourage learning and partnerships between organisations.

Brain Injury Australia's lease was rent-free as well, for three years.

Brain Injury Australia's reputation with governments continues to improve. It was engaged by the Job Capacity Assessment branch of the Department of Human Services to produce a 30-minute ABI training DVD for the nation's 1,500 Job Capacity Assessors - who test the ability to work of people applying for income support - as well as Centrelink and Employment Service Provider staff.

The DVD was filmed on June 30 and

Brain Injury Australia eagerly awaits its release.

The leading cause of Traumatic Brain Injury throughout the developed world - in fact, the leading cause of all *injury hospitalizations* - is falls. This is due to populations ageing. But it comes as a surprise to people who work in disability, even those who work directly in ABI advocacy. I suspect that this a function of the difference between organisations that lobby on behalf of a constituency, like Brain Injury Australia, and those who provide services or supports to individuals - that they only "see" whom you're funded to help. Or who's most able to ask for it.

The Australians with the highest Traumatic Brain Injury and Traumatic Brain Injury *death* rates as well as falls injury and falls deaths rates are those aged 85 and over.

Brain Injury Australia spent some time during the year researching, writing and presenting to its policy paper prepared for the Australian Government's Department of Families, Housing, Community Services and Indigenous Affairs (FaHCSIA) on falls-related Traumatic Brain Injury. It is hoped that awareness-raising and advocacy on this topic will continue for some years.

You will also notice that Brain Injury Australia has a new logo. Such redesigning can be very expensive. Brain Injury Australia decided to open creation

of a new logo to students of graphic design at Victorian universities, TAFEs and private colleges, in exchange for credit for the lifetime of the logo's use. The work of Charlene Yee Shuang, from Monash University's Department of Design, was chosen. Brain Injury Australia's new logo will also be applied to a redesign of its website courtesy of some additional "capacity-building" funding from FaHCSIA.

I want to especially thank Brain Injury Australia's Office Manager, Robert Curran, for the fine, detailed and very broad work – above and beyond the job description – that he has done in the course of the year.

I also want to thank Brain Injury Australia's President, Kerry Stafford and the Board for their continued support. And through Brain Injury Australia's membership of the volunteer matching service, goodcompany, preparation for our audit benefited greatly from the work of accountant Vivekanandarajah Carthigeyan.

Nick Rushworth
Executive Officer

Treasurer's Report

Deborah Byrne

I have pleasure in presenting the audited Financial Statements for Brain Injury Australia (BIA) for the year 1 July 2008 to 30 June 2009.

The Financial Statements show BIA to be in a sound position with an operating surplus of \$33,765.

As detailed in Note 1, the Board has determined that BIA is not a reporting entity and as such the financial report is a special purpose report prepared in order to satisfy the financial reporting requirements of the Associations Incorporation Act 1981 (ACT).

The Income Statement shows a significant increase in both Revenue and Expenses between 2008 and 2009. This is largely due to income and expenses associated with the combined 2nd International Conference on Alcohol and Other Drug Related Brain Impairment and the Brain Injury Australia National Conference held in Melbourne in September 2008.

Members will note current assets and liabilities are clearly itemised in the Balance Sheet. The decrease in liabilities is as a consequence of the pre-paid FaHCSIA grant of \$30 000, paid to BIA in the 07/08 financial year.

The Board of Management in April 2009 confirmed the appointment of Stewart,

Brown & Co as Brain Injury Australia auditor; it should be noted the auditor has not raised any concerns in regard to the 2008/2009 audit.

The BIA Board of Management is conscious of their fiduciary duty in allocating the limited resources of the organisation. Brain Injury Australia remains able to meet future trading commitments.

**BRAIN INJURY AUSTRALIA INCORPORATED
FINANCIAL REPORT - 30 JUNE 2009
STATEMENT BY MEMBERS OF THE BOARD**

The board has determined that the association is not a reporting entity and that this special purpose financial report should be prepared in accordance with the accounting policies outlined in Note 1 to the financial statements.

In the opinion of the board the financial statements, which comprise the income statement, balance sheet, statement of changes in equity, cash flow statement and notes to the financial statements:

- a) presents a true and fair view of the financial position of Brain Injury Australia Incorporated as at 30 June 2009 and its performance for the year ended on that date in accordance with the accounting policies described in Note 1 to the financial statement; and
- b) at the date of this statement, there are reasonable grounds to believe that Brain Injury Australia Incorporated will be able to pay its debts as and when they become due and payable.

This statement is made in accordance with a resolution of the board and is signed for and on behalf of the board by:

The above cash flow statement should be read in conjunction with the accompanying notes.

BRAIN INJURY AUSTRALIA INCORPORATED
NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE
2009

Note 1 – Statement of significant accounting policies

This financial report is a special purpose financial report prepared in order to satisfy the financial reporting requirements of the Associations Incorporation Act 1981 (ACT). The committee has determined that the association is not a reporting entity.

The financial statements have been prepared on an accruals basis and are based on historic costs and do not take into account changing money values, or except where specifically stated, current valuations of non-current assets.

The following significant accounting policies, which are consistent with the previous period unless otherwise stated, have been adopted in the preparation of this financial report.

Income tax

The association is exempt from income tax.

Property, plant & equipment

Property, plant and equipment are carried at cost less, where applicable, any accumulated depreciation. All property, plant and equipment are depreciated over their estimated useful lives commencing from the time the asset is first held ready for use.

Impairment of assets

At each reporting date, the association reviews the carrying values of its tangible and intangible assets to determine whether there is any indication that those assets have been impaired. If such an indication exists, the recoverable amount of the asset, being the higher of the asset's fair value less costs to sell and value in use, is compared to the asset's carrying value. Any excess of the asset's carrying value over its recoverable amount is expensed to the income statement.

Employee benefits

Provision is made for the company's liability for employee benefits arising from services rendered by employees to balance date. Employee benefits have been measured at the amounts expected to be paid when the liability is settled.

Cash & cash equivalents

Cash and cash equivalents includes cash on hand, deposits held at call with banks, and other short-term highly liquid investments with original maturities of three months or less.

6 (cont)

Revenue

Revenue is measured at the fair value of the consideration received or receivable. Grant revenue is recognised in the income statement when the Association obtains control of the grant and it is probable that the economic benefits gained from the grant will flow to the Association and the amount of the grant can be measured reliably. If conditions are attached to the grant which must be satisfied before it is eligible to receive the contribution, the recognition of the grant as revenue will be deferred until those conditions are satisfied. Interest revenue is recognised using the effective interest rate method, which for floating rate financial assets is the rate inherent in the instrument. All revenue is stated net of the amount of goods and services tax (GST).

Goods and services tax (GST)

Revenues, expenses and assets are recognised net of the amount of GST, except where the amount of GST incurred is not recoverable from the Tax Office. In these circumstances the GST is recognised as part of the cost of acquisition of the asset or as part of an item of the expense. Receivables and payables in the balance sheet are shown inclusive of GST.

BRAIN INJURY AUSTRALIA INCORPORATED

FINANCIAL REPORT - 30 JUNE 2009 - INDEPENDENT AUDIT REPORT TO THE MEMBERS

Scope

Report on the financial report

We have audited the accompanying financial report, being a special purpose financial report, of Brain Injury Australia Incorporated (the association), which comprises the balance sheet as at 30 June 2009 for the year then ended, the income statement, statement of changes in equity, cash flow statement, a summary of significant accounting policies, other explanatory notes and the statement by members of the board.

Board's Responsibility for the Financial Report

The board of the association is responsible for the preparation and fair presentation of the financial report and have determined that the accounting policies described in Note 1 to the financial statements, which form part of the financial report, are consistent with the financial reporting requirements of the Associations Incorporation Act 1981 (ACT) and are appropriate to meet the needs of the members. The board's responsibilities also include designing, implementing and maintaining internal control relevant to the preparation and fair presentation of the financial report that is free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditor's Responsibility

Our responsibility is to express an opinion on the financial report based on our audit. No opinion is expressed as to whether the accounting policies used, as described in Note 1, are appropriate to meet the needs of the members. We conducted our audit in accordance with Australian Auditing Standards. These Auditing Standards require that we comply with relevant ethical requirements relating to audit engagements and plan and perform the audit to obtain reasonable assurance whether the financial report is free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial report. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial report, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial report in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of

expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the board, as well as evaluating the overall presentation of the financial report.

The financial report has been prepared for distribution to members for the purpose of fulfilling the board's financial reporting requirements under the Associations Incorporation Act 1981 (ACT). We disclaim any assumption of responsibility for any reliance on this report or on the financial report to which it relates to any person other than the members, or for any purpose other than that for which it was prepared.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Independence

In conducting our audit, we have complied with the independence requirements of Australian professional ethical pronouncements.

Auditor's Opinion

In our opinion, the financial report of Brain Injury Australia Incorporated presents fairly, in all material respects the financial position of Brain Injury Australia Incorporated as of 30 June 2009 and of its financial performance for the year then ended in accordance with the accounting policies described in Note 1 to the financial statements and the Associations Incorporations Act 1981 (ACT).
